Preventing fire hazards caused by thermal runaway

Thermal Barrier Sheet

Highly filled with inorganic fibers and powder based on papermaking technology developed over many years

Features

- Fireproof quality: UL94 V-0 equivalent
- Thermal barrier:

No tearing damage even after being heated for a certain period of time $(800^{\circ}C, 10min)$

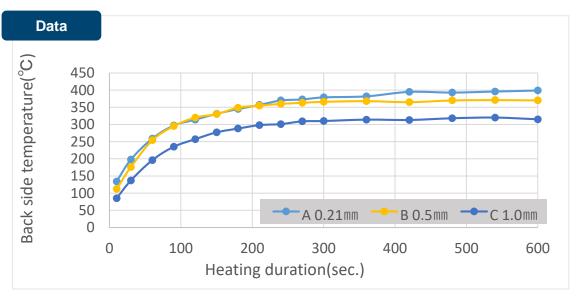

The back side temperture of heating surface does not rise

Surprising Solutions

TOMOEGAWA

Measures against Ignition of Various Batteries

* The data are measurements, not guaranteed values.

Application

- Preventing combustion of lithium-ion batteries, etc.
- Providing thermal barrier capability when used with other sheets
