バイオマス
使用部位: テープ本体
No.240009

The Biomass Mark is an indicator of environmental products that utilize bio-based resources (biomass) and is awarded to products that pass an evaluation by an independent committee of experts from the Japan Organics Recycling Association. Learn more: <https://www.jora.jp/biomassmark/>

Application

- Packaging, Sealing (mainly for sealing cardboard), Online-shopping packages, Frozen food, Cash vouchers, etc.

Trivia

"Gummed tape" is a tape that becomes adhesive when wet. Most of the tapes you use are "kraft adhesive tapes" with synthetic adhesive.
